AI Conversation Designer ♦ UX/UI Writer ♦ Product Designer

AI conversation design specialist and content designer with a decade of shipped experiences across voice assistants, chatbots, multimodal wearables, and agentic products at Meta, Intuit, and PullString. Expert at translating complex, regulated-domain concepts into clear, actionable content users can act on. Equally at home in Figma, Docs, or Terminal, crafting both the words and systems behind user interactions.

- **Systems-level content thinking:** built voice and tone frameworks, taxonomies, prompts, flows, and response templates to make AI interactions feel natural.
- **Technically fluent in AI architecture:** shaped multiple multimodal AI experiences on smart glasses and enterprise chatbots, launching new products and features in high-urgency, ambiguous spaces.
- **Practiced cross-functional partner:** working closely across disciplines, with a track record of defining new product spaces and evangelizing content and conversation disciplines across organizations.

META Remote | 2021-2026

Senior Product & Conversation Designer

Led conversation and voice UX design for AI smart glasses features and experiences across multimodal, live AI, autcapture, QR payments and more. Shaped agent identity, voice and tone. Was promoted with consistent *Exceeded Expectations* ratings across review cycles.

PROJECTS

- **Multimodal & Live AI.** Lead CxD crafting end-to-end voice conversation flows, invocation systems, and NLU utterances. Co-led Early Access and General Audience launches on RBM glasses, defining session openers, error and edge cases, and TTS responses tuned from user and dogfooding feedback.
- **Autocapture.** Conversation design lead for the on-frame Autocapture experience integrating a constellation of devices and leveraging multimodal AI to automatically capture high-interest, pertinent moments.
- **CxD Mentorship.** Scaled conversation design knowledge across Meta Reality Labs by mentoring senior designers, co-presenting an RL-wide Design Talk on Conversation Design, and built a VUI Resource Hub to onboard Voice PMs.

INTUIT Mountain View, CA | 2018-2021

Principle Content & Conversation Designer

Led content and conversation design strategy for QB Assistant, translating complex financial concepts into clear, compliant, self-help experiences for small business owners. Responsible for persona, voice and tone and creating conversational flows, content, and intents.

PROJECTS

- **QB Assistant.** Grew the capabilities and reach of the in-product chatbot with a focus on self-help, product insights, & proactivity.
- **QuickBooks.** Content strategy and design for various QuickBooks flows and experiences.
- **Thought Leader.** Evangelized the conversation design discipline across Intuit leading workshops, persona development sessions, and content salons.

PULLSTRING San Francisco, CA | 2015-2018

UX Writer & Designer

Wrote, coded, and designed 20+ human-machine interactive products as writer, coder, UX designer, content strategist, and voice director.

PROJECTS

- **Mattel.** Designed neural network, coded conversation modules, and wrote 10,000 lines of content for first interactive Barbie, voted #2 TIME Toy of the Year.
- **Google Home & Alexa.** Built two family-friendly kids games. Led end-to-end production of a gameshow skill; redesigned intent recognition system for SpongeBob Challenge.
- **Humani.** Co-created Jessie Humani, a 20-hour interactive SMS game featured at 2016 F8 Conference; led branching narrative design, writing, coding, and QA.
