Senior Product Designer | AI and Conversational Experiences

Product designer specializing in AI and conversational experiences, with 10+ years of experience shipping multimodal products, voice assistants, chatbots, and interactive experiences at Meta, Intuit, and PullString. Designs customer-facing interactions and the systems behind them. Leads ambiguous, zero-to-one initiatives and aligns cross-functional teams around compelling product experiences.

- **AI product design.** Designed and launched AI experiences across smart glasses, enterprise software, voice assistants, and chatbots.
- **Systems thinking.** Built interaction frameworks, prompts, taxonomies, intent systems, and voice-and-tone standards that enabled natural, cohesive experiences at scale.
- **Cross-functional leadership.** Defined emerging product spaces and aligned product, engineering, research, and design from concept through launch.

META Remote | 2021-2026

Senior Product and Conversation Designer

Led product, conversation, and voice UX design for multimodal experiences across Meta's AI glasses portfolio, which sold more than 7M units in 2025. Defined agent identity, interaction patterns, voice, and tone across features including Live AI, Autocapture, and QR payments. Promoted to the next IC level while consistently earning *Exceeded Expectations* ratings.

- **Live AI.** Led interaction and voice design for a continuous multimodal AI experience, defining invocation, multi-turn flows, error recovery, and TTS responses from early access through general availability in North America.
- **Autocapture.** Led design of the on-frame experience for a cross-device feature that used activity signals to automatically capture high-interest moments. Showcased at Meta Connect 2024 and launched with Oakley Meta Vanguard.
- **Design leadership.** Expanded conversation design capabilities across Reality Labs by mentoring senior designers, co-presenting an organization-wide design talk, and contributing to a voice UX resource hub.

INTUIT Mountain View, CA | 2018-2021

Principal Content and Conversation Designer

Led content and conversation design for QB Assistant, serving 1.7M lifetime users and 25K daily users. Owned the conversational architecture, intent systems, content, and voice and tone for compliant, self-service finance experiences. Promoted from Senior to Principal.

- **QB Assistant.** Expanded the assistant across three QB products and from about 200 to 600+ intents, adding self-service, personalized insights, and proactive guidance.
- **Bank connection.** Designed an API-integrated flow for customer-actionable banking errors, increasing resolution from 62% to 63.8% in a statistically significant A/B test.
- **Design leadership.** Supported the growth of the conversation-design practice from 2 to 20+ designers and led ongoing workshops, persona sessions, and content salons.

PULLSTRING San Francisco, CA | 2015-2018

UX Designer and Writer

Designed, wrote, and implemented 20+ conversational products across connected toys, chatbots, smart speakers, and SMS. Owned end-to-end interaction design, persona and narrative development, voice and tone, and content and intent systems.

- **Hello Barbie.** Designed the conversational architecture, coded dialogue modules, and wrote 10,000 lines of content for Mattel's first conversational Barbie doll.
- **Google Home and Alexa.** Built two voice games for children. Led production of a game-show experience and redesigned the intent system for the SpongeBob skill.
- **Humani.** Co-created a 20-hour interactive SMS game featured at F8 2016. Led its branching narrative design, writing, implementation, and QA.
